Excel Advanced: Sales Analytics

VIDEO TITLE

ETL (Extract, Transform and Load Data) in Excel I

- 1 ETL stands for **Extract, Transform, Load**. It refers to the process of extracting data from various sources, transforming the data to fit the desired data model or format, and loading the data into a target data store or destination.
- 2 Power Query transforms and connects data from different sources, such as databases and spreadsheets, into a format suitable for analysis and reporting.
